

# PRESS RELEASE

## “Technology was the answer!” – creating a successful medical practice in Port Jefferson

Dr. Mormando of Port Jefferson Medical partners with Comtech Networks in order to invite other professionals to learn from his successful experience.

*Long Island, October 3, 2005*

Dr. Mormando invites all doctors and other interested people to the **Old Field Club, on October 19<sup>th</sup>** for an early breakfast meeting. He would like to share his own success story, how he grew his practice from a startup to a thriving 6 provider group in under 3 years

The meeting will be an interactive session and will show how various technologies can revolutionize medicine and take healthcare into the 21st century.

Dr. Mormando will talk about the pros and cons of adopting an EMR/EHR electronic chart system, and how to survive in a professional's struggle with declining reimbursements and malpractice premiums.

This event is sponsored by Dr. Mormando's long-time technology partner Comtech Networks, a local medical solutions provider. Comtech transformed Dr. Mormando's practice into a very modern and efficient running medical office.

Dr. Mormando is President and Founder of “Port Jeff Medical Care” in Port Jefferson Station, a medical office with 6 practitioners.

---

### **About Comtech Networks:**

Comtech Networks (established in 1988) provides “digital solutions for the medical office”, through assessment, analysis, and implementation of customized systems. Comtech offers partial or complete solutions for EMR (Electronic Medical Record), document management, scheduling, billing and general IT challenges.

Since 1996, the Long Island (New York) based company has focused on the needs of the medical office. Gaining outstanding expertise with HIPAA compliance challenges, Comtech Networks is now focused completely on helping every medical office in the North East to become part of the National Electronic Health Care Record Network (EHR).
